

LEATHER WELDING PROTECTION GARMENTS

Leather sleeves

MC6512

MATERIALS

1mm cowhide split suede leather

FEATURES

Protective sleeves made of split suede cowhide leather, 1 mm thick, designed to ensure resistance to heat, sparks, and abrasions during welding operations and metalworking. Ideal for high thermal risk environments, compatible with other personal protective equipment. Certified to offer maximum protection for those working in welding and related processes, it protects against molten metal splashes, radiant heat, and limited flame contact. The sleeves are equipped with elastic bands at the ends, which ensure a perfect fit and prevent displacement during use. The length of 40 cm ensures effective forearm and wrist protection, while maintaining freedom of movement. Compatible with other personal protective equipment, they represent a reliable solution for high thermal risk environments.

QUANTITY PER CARTON

50

CATEGORY

II -> This product is currently planned and produced to comply with Regulation (EU) 2016/425 and subsequent modifications.
