

LEATHER WELDING PROTECTION GARMENTS

Leather gaiters

MC6513

MATERIALS

1mm cowhide split suede leather

FEATURES

Protective gaiters made of suede split cowhide leather, 1 mm thick, designed to ensure resistance to heat, sparks, and abrasions during welding operations and metalworking. Ideal for high thermal risk environments, compatible with other personal protective equipment. Certified to offer maximum protection for those working in welding and related processes, it protects against molten metal splashes, radiant heat, and limited flame contact. With a height of 40 cm, they offer effective coverage of the lower leg and boot collar, protecting against thermal and mechanical risks. The robust structure ensures long-term durability and compatibility with other personal protective equipment. Ideal for high thermal risk environments, they represent a reliable solution for operator safety.

QUANTITY PER CARTON

50

CATEGORY

II -> This product is currently planned and produced to comply with Regulation (EU) 2016/425 and subsequent modifications.
