

LEATHER WELDING PROTECTION GARMENTS

Leather jacket

MC6514

MATERIALS

1mm cowhide split suede leather

FEATURES

Protective jacket made of suede split cowhide leather, 1 mm thick, designed to ensure resistance to heat, sparks, and abrasions during welding operations and metalworking. Ideal for high thermal risk environments, compatible with other personal protective equipment. Certified to offer maximum protection for those working in welding and related processes, it protects against molten metal splashes, radiant heat, and limited flame contact. The design includes a detachable hood, which allows adapting the protection according to operational needs, and elasticated cuffs, for a secure closure that prevents sparks from entering and improves fit. Compatible with other personal protective equipment, it offers a reliable solution for high thermal risk environments.

DETAILS

- Detachable hood, ideal for use as needed and removal when not required;
- Elasticated cuffs, for a stable and comfortable fit.

CLOSING

Velcro

IMPORTANT

The jacket is certified in combination with the Leather trousers MC6515.
