

Name: ESD polo shirt	Code: MC6723K1	MC67 INDUMENTI ALTA VISIBILITA SPIN
-----------------------------	-----------------------	--

Description

Composition: 53% cotton, 45% polyester, 2% conductive fibre - weight 180 g/m

- ✓ Ribbed fabric collar for greater comfort, resistance and stability, maintaining a neat appearance even after prolonged use;
- ✓ Placket with three matching buttons;
- ✓ Double-stitched armholes for greater strength and durability.
- ✓ Conductive fibres in the fabric dissipate electrostatic charges, preventing them from accumulating on the garment.

Polo shirt made of multi-purpose ESD fabric, designed to ensure maximum safety for those working in controlled environments by reducing the risk of electrostatic discharges. The ergonomic design and breathable materials ensure comfort and freedom of movement. The garment is made with materials that provide antistatic properties, thanks to conductive fibres. Designed to dissipate electrostatic charges and prevent damage to sensitive electronic components. The lightness of the fabric and the high percentage of cotton, combined with technical fibres, help to perfectly balance protection and comfort, making the garment soft and breathable without compromising its functionality. In addition to worker safety, they help to protect electronic devices, which could be damaged by electrostatic charges. The ribbed fabric collar with three buttons offers greater operational safety and a clean finish. The double stitching reinforces the armhole area, which is subject to frequent movement and pulling. It also helps to maintain the shape, preventing it from deforming or stretching with use.

CERTIFICATION IN PROGRESS

The product has been designed and manufactured to comply with Regulation (EU) 2016/425 as amended.

Verifying the product's compliance with the CE mark requirements is in progress.

Dexterity

Read the instructions carefully before use.
Store in a cool, dry place, away from heat sources and away from light.

Before each use, carry out a visual check to ensure that the device is in perfect condition, undamaged and clean, and replace it if it is not intact.

Garments offer protection only for the part of the body actually covered and must therefore be integrated, depending on the intended use, with suitable PPE to protect exposed parts of the body (head, hands, feet). Where necessary, use appropriate respiratory and eye protection.

The safety features indicated are only respected if the device is regularly worn and fastened and in perfect condition.

Follow the recommended washing instructions.
