

## ESD GARMENTS

### ESD coat

MC6729

#### MATERIALS

Twill 98% cotton, 2% conductive fiber.

#### GRAMMAGE

145 g/m²

#### FEATURES

ESD work coat made from versatile ESD fabric, designed to ensure maximum safety for those working in controlled environments, reducing the risk of electrostatic discharges. The ergonomic design and breathable materials ensure comfort and freedom of movement. The garment is made with materials that provide antistatic properties, thanks to conductive fibers. Designed to dissipate electrostatic charges and prevent damage to sensitive electronic components. The lightness of the fabric and the high percentage of cotton, combined with technical fibers, contribute to perfectly balancing protection and comfort, making the garment soft and breathable without compromising its functionality. In addition to worker safety, it also helps protect electronic devices that could be damaged by electrostatic charges. The 3 pockets make the coat practical and functional, as does the snap button closure covered by a flap. The elasticated cuffs offer a perfect fit and sleeve stability throughout the entire work shift.

#### DETAILS

- 2 side pockets, to ensure quick and easy access to smaller items;
- Chest pocket with pen holder;
- Elasticated cuffs for a perfect fit and sleeve stability, even during work;
- The conductive fibers in the fabric dissipate electrostatic charges, preventing their accumulation on the garment.

#### CLOSING

Snap fasteners covered by a placket.

#### AVAILABLE COLOURS

K1 - White

Q7 - Navy

#### SIZES
