Name: ESD socks	Code: MC6731AM	MC67 INDUMENTI ALTA VISIBILITA SPIN
------------------------	-----------------------	--------------------------------------------

FR fabric sock with a high percentage of cotton, making the fabric soft and comfortable.

The conductive fibres in the fabric dissipate electrostatic charges, preventing them from accumulating on the sock.

Made from 50% FR acrylic, 26% combed cotton, 20% nylon, 2% conductive fibre, 2% elastane.

The product has been designed and manufactured to comply with Regulation (EU) 2016/425 as amended.
