Direct embroidery on chest

PA110003

DETAILS

Direct embroidery on garments, chest area. Embroidery is a customization obtained using an industrial machine that creates designs/lettering with colored thread, directly on fabric. Choose contrasting colors compared to the fabric they are applied to, so that they are clearly visible. Reference embroidery set up: code PA150004 Possibility of embroidery with flame-retardant thread on multi-standard garments. For special embroideries or lettering exceeding 11 cm, it is necessary to request an ad hoc offer.
